

Alwin Philip

AI / LLM / Agentic Engineer

River Vale, NJ | (201) 952-9492 | alwinphilip0105@gmail.com | alwinphilip.online | linkedin.com/in/alwin-philip-student | github.com/Alwinphilip0105

SUMMARY

AI engineer who ships LLM and agent systems to production. Runs an agentic fax-filing pipeline (450–500 clinical documents/week) and an EHR workflow at Beacon Health AI, built generative-AI tools on AWS Bedrock for NJ state government, and built a multi-model Claude platform that automates the job search end to end. M.S. Computer Science, Rutgers.

TECHNICAL SKILLS

LLM & Agents: Claude API, AWS Bedrock, LangChain, RAG, Agentic AI Systems, Prompt Engineering, human-in-the-loop design

ML: PyTorch, TensorFlow, Scikit-learn, XGBoost, NLP, TinyBERT, OpenAI Whisper, ONNX Runtime, Captum XAI

Engineering: Python, TypeScript, SQL, Java, FastAPI, REST APIs, React, Node.js, Playwright, n8n

Cloud & Data: Cloud Deployment, AWS (S3, Lambda, EC2, Athena, QuickSight, Bedrock), GCP, Oracle Cloud, PostgreSQL, MongoDB, Docker, CI/CD

EXPERIENCE

Agentic AI Engineer (Contract)

May 2026 – Present

Beacon Health AI, Brooklyn, NY

- Own a production fax-processing pipeline built around an automated fax-filing agent, handling 450–500 clinical documents a week (~9,000 since May 2026).
- Own an EHR data workflow integrating Athena, Medent and Elation that automates patient scheduling and follow-ups for 3 primary care centers under HIPAA.
- Audited agent run-history logs against Cyberdesk (source of truth), resolving data discrepancies with the engineering team.

Software Development Specialist (Analytics/AI)

Jun 2026 – Aug 2026

New Jersey Department of Labor and Workforce Development, Trenton, NJ

- Built generative-AI applications on AWS Bedrock, including prompt-engineering workflows used across department operations.
- Built interactive AWS QuickSight dashboards on the department's AWS data lake, giving leadership and program staff self-serve views of workforce and labor-market trends.

Marketing Analytics and AI Specialist

Aug 2024 – May 2026

Rutgers-Camden School of Business, Camden, NJ

- Led the GitHub Copilot and Microsoft Copilot rollout at Thayer Distribution, training employees to automate workflows and measuring a 20% gain in delivery velocity.
- Designed and delivered prompt-engineering and AI-tool training for professional and corporate audiences.

Data Science and AI Research Intern

Jun 2025 – Aug 2025

Code-blue.ai (UC Berkeley-affiliated startup), Berkeley, CA

- Built real-time stroke detection from facial-asymmetry and speech-pattern analysis, with sensitivity and specificity above 90%.
- Raised the speech-recognition model to 98.9% accuracy by expanding and diversifying its training data to nearly 17,000 audio samples from the TORGO and UA-Speech datasets.

PROJECTS

LeanJobOS – AI Job-Search Platform | FastAPI, React/TypeScript, Playwright, Claude API, SQLite, Oracle Cloud Jul 2026 – Present

- Built an LLM router across three Claude model tiers, sending each task (JD extraction, email classification, résumé tailoring, cover letters) to the cheapest model that meets quality – about \$0.07 of AI cost per application.
- Automated applications with Playwright form adapters for 7 ATS platforms behind a mandatory human-approval gate; the agent pauses for CAPTCHAs and sign-ins instead of evading them.
- Deployed on an Oracle Cloud VM (Caddy HTTPS, systemd timers, Xvfb/noVNC live browser view, Web Push notifications); 901 automated tests.

Multimodal Dementia Classification System | Python, PyTorch, Wav2Vec2, Transformers, OpenAI Whisper, Captum, ONNX Dec 2025

- Reached 90.2% classification accuracy with the multimodal fusion model, adding a Captum explainability layer and ONNX export for framework-agnostic deployment.

EDUCATION

M.S. Computer Science, Rutgers University-Camden – GPA 3.65 · President, Graduate Student Organization Sep 2024 – May 2026

B.Tech Information Technology, Amity University – GPA 3.82 Sep 2020 – Jun 2024

CERTIFICATIONS AND AWARDS

AWS Certified Solutions Architect - Associate (Expected September 2026) · Rutgers-Camden AI Campus: AI/ML Project Learning (March - May 2026) · Google Analytics Advanced · Google Cloud: Generative AI, LLMs, Image Captioning, Transformer Models (2024) · Google Cloud: Infrastructure Modernization, Security and Operations (2024) · Best Paper Award, IEEE ICRITO · 1st Place, TECHNIVATE 2024 · Most Promising Project, Tech-Genesis Industrial Meet · Bronze Award, Cisco NetAcad Riders 2023 · Published: IEEE 11th ICRITO, May 2024; International Journal of Systems and Applications (Springer), Nov 2024
